Field Service Bulletin

Canadian Provincial and Territorial Time Zone Change

Introduction

Beginning Sunday, November 1, 2026, the following Provinces and Territories are adopting permanent time zones:

- Manitoba: **Manitoba Standard Time (UTC-5:00)**
- Alberta: **Alberta Time (UTC-6:00)**
- The Northwest Territories: **Northwest Territories Time (UTC-6:00)**
- British Columbia: **Pacific Time (British Columbia) (UTC-7:00)**

What's changing?

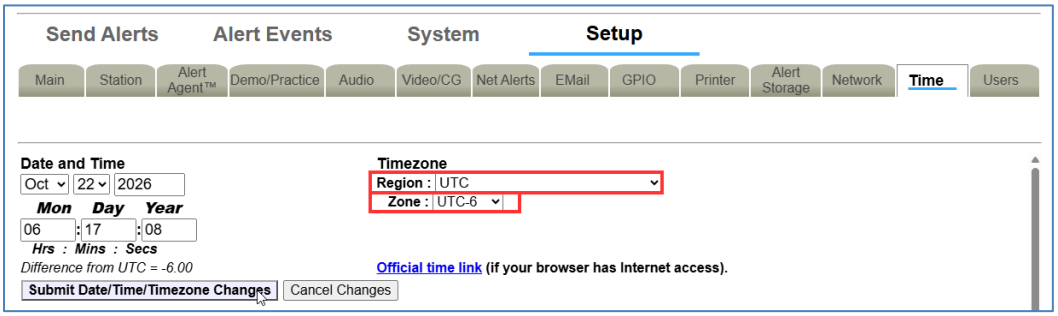

Impacted users will need to change *Region* and *Zone* in their DASDEC's time zone settings, to account for the upcoming changes

Changing Your Time Zone

1. Log in to the DASDEC

2. Go to ***Setup > Time***

3. In the ***Timezone*** section, change the **Region** to UTC, and then set the **Zone** to reflect the associated permanent time zone offset. Click on the pulldown menu for each setting, and select the desired option.

Note: In this example, UTC-6 is being chosen to align with **Alberta Time (UTC-6:00)**. Select the option that is appropriate for your region.

4. When finished, click the button to **Submit Date/Time/Timezone Changes.** You will be brought to the login screen, while the software restarts due to the time zone change. Once the restart finishes, you can log back into the DASDEC
